

# See Clear Across the Enterprise

## Post Production Services

Maximize your Workday investment with comprehensive and flexible post production support (PPS) service offerings supported by our experienced, onshore resources.

### Partnership with CrossVue

**Tailored Approach.** Each customer is unique. We tailor our services and approach to your specific needs by providing multiple contract tiers that allow you to use only the services that you require.

**Empowerment through Partnership.** As an extension of your team, we prioritize knowledge transfer and hands-on learning, sharing best practices and technical expertise.

**Delivering Comprehensive Services.** Our certified US based experts ensure seamless integration and ongoing optimization of your Workday solutions through flexible, scalable, and strategic planning.

**Building Trust with Experience and Dedication.** Our strong PPS employee and customer retention track record reflect our commitment to long-term, trust-based partnerships and exceptional service.

### Our Differentiators

100% US-based consultants who average 5+ years of Workday experience, 5+ certifications, and often come from the client side of Workday.

A balanced team (50% HCM and 50% FIN resource allocation) ready to execute on Full platform including Integrations, Adaptive Planning, and Extend.

90% customer retention rate that proves our customer loyalty and belief in their value achievement.

90% PPS employee retention rate ensuring long-term business outcomes for customers as we get to know their business and execute on their strategic roadmap.

Flexibility to reassess and adjust contract hours after six months.

## What our Clients Value

We are committed to excellence and are the dedicated team that will support you throughout your journey. Don't take our word for it; hear from some of our customers.

### Trust

*Should my staff not be able to address something, or should the staff be overutilized, I always know that CrossVue will be behind my folks, so when we need help, guidance, or best practice recommendations, we get it immediately." - Director | June 2024*

### Depth of Expertise

*The staff and consultants from CrossVue are all very technically savvy. They understand not only our EHR but also our business and how we use the system. They go in and look at our system before they even engage with us to make sure that they understand what the issue is. In most cases, they actually come up with solutions before we even have an initial call." - Director, June 2024*

Customer commentary from KLAS Research
